**Work Permit:** EU/EFTA Citizen (Unrestricted Access to Swiss Labor Market) **Availability:** Immediate / Negotiable

## PROFESSIONAL SUMMARY

Results-driven Full-Stack JavaScript/TypeScript Developer with 4+ years of hands-on experience designing and deploying scalable B2B software solutions. Proven track record of boosting system data efficiency by over 30% across 10+ successfully shipped projects. Recently relocated to Switzerland and highly motivated to bring deep expertise in full-stack implementation, backend architecture, and workflow automation to an innovative Swiss tech organization.

## TECHNICAL CORE COMPETENCIES

<b>Frontend Architecture</b>	React, Angular, SCSS, Tailwind CSS, Ant Design, State Management (Zustand, Redux)
<b>Backend &amp; Database</b>	Node.js, Express.js, TypeORM, Mongoose, RESTful APIs, GraphQL, Relational Databases
<b>Full Stack &amp; QA</b>	TypeScript, JavaScript (ES6+), Playwright, Cypress, Jest, Vitest, E2E & Unit Testing
<b>DevOps &amp; Cloud</b>	AWS (Amazon Web Services), Vercel, Heroku, GitHub Actions, DigitalOcean, CI/CD Workflows

## PROFESSIONAL EXPERIENCE

### Frontend Developer Oct 2024 – Oct 2025

IriusRisk | Huesca, Spain (Remote)

- Engineered 20+ reusable React components using React Query and Zustand; boosted system data efficiency by 30% backed by automated testing frameworks.
- Tailored and optimized the AntDesign UI framework, cutting ongoing maintenance overhead by 25% through modular interface structures.
- Contributed as a core member of a 3-person hackathon team (won 2nd place), pitched technical architecture to stakeholders, and executed code quality reviews for 50+ incoming Pull Requests (PRs).

### Software Engineer (Contractor) Nov 2022 – Apr 2024

Beyondbmi | Dublin, Ireland (Remote)

- Developed an interactive weight-tracker utility using Chart.js (+30% user engagement metrics) and built a performant Angular video modal module using the Daily.co API interface.
- Proactively identified and fixed critical backend API bugs and constructed End-to-End (E2E) QA automated validation matrices out of scope to safeguard milestone production releases.
- Integrated third-party workflows including Tally, Cronofy, Stripe, and AWS Cognito, increasing booking and scheduling transaction throughput efficiency by 30%.

### Full-Stack Developer Oct 2021 – Nov 2022

GABO (Self-Employed) | Global (Remote)

- Designed and shipped 10+ responsive web platforms and landing pages for SMEs, improving digital brand visibility and engagement thresholds by an average of 20%.
- Automated critical operational processes for a certified European Digital Kit Provider, improving SME transactional efficiency by 30%.
- Delivered specialized full-stack, frontend, and QA software components for technology startups in accelerators, successfully decreasing target Time-to-Market by 25%.

### UI Designer & Technical Support Specialist (Combined Roles) Feb 2022 – Aug 2022

talenTeal & Lujo Network | Valencia, Spain

- Spearheaded landing page layout transformations at talenTeal, boosting active user engagement by 45% via targeted UX/UI design patterns.
- Engineered secure sign-in flows and internal infrastructure firewalls at Lujo Network, enhancing baseline digital security by 40%.
- Migrated unorganized legacy data structures from Google Sheets into a relational database system, cutting hybrid workflow downtime metrics by 30%.

## EDUCATION & CERTIFICATIONS

---

### Full-Stack Web Development (MERN Stack Diploma)

2022

CEU Cardenal Herrera University

### Professional Certifications (DevOps & Cybersecurity Architecture)

2021 – 2022

Cloud-native CI/CD Workflows & Critical Enterprise Asset Protection | Charles Sturt University

### Strategic Software Development Specialization (JavaScript & TypeScript)

2019 – Present

Strategic shift from theoretical university studies after 1 year to immerse directly into commercial application engineering; built, architected, and successfully launched 10+ complex production-grade applications.
